Professional Summary

AI Consultant specializing in Agentic AI workflows, intelligent automation, enterprise integrations, and document-centric AI platforms. Experienced in designing scalable AI systems using Python, FastAPI, React, Power Automate, LangGraph, and GenAI technologies. Strong expertise in building multi-agent AI workflows, SAP S/4HANA and SAP ByDesign integrations, approval systems, REST APIs, workflow orchestration, and AI-driven process optimization. Proven ability to deliver production-grade automation platforms that reduce operational effort, improve accuracy, and accelerate enterprise business workflows.

Core Competencies

- GenAI & AI Automation
- Agentic AI Workflows
- Python Development
- FastAPI & Flask
- React JS
- Power Automate
- SAP S/4HANA Integration
- SAP ByDesign Integration
- LangGraph & Agentic AI & Langchain
- REST API Development
- Machine Learning
- Document AI Systems
- Workflow Automation
- RPA Solutions
- FAISS Semantic Search
- ServiceNow Integrations
- Power Apps

Professional Experience

AI & Data Integration Consultant(Contract)

SBGC & Enterprise AI Automation Projects

2025 – Present

- Designed and implemented AI-powered automation platforms integrating SAP ByDesign and SAP S/4HANA.
- Built enterprise workflows using Power Automate and Power Apps for approval management, validations, and process automation.

AI & Automation Engineer

NoblQ

2025 – Present

- Developed AI assistants and automation systems for enterprise business operations.
- Worked on document-centric AI platforms with semantic indexing, summarization, and intelligent Q&A systems.
- Implemented automation solutions for SAP-related business processes using GenAI and machine learning.
- Collaborated on AI research initiatives focused on Tamil language AI innovation.
- Developed Agentic AI workflows and GenAI-driven assistants for organizational workflow optimization, document-centric AI operations, and enterprise automation.
- Integrated REST APIs, AI models, and enterprise systems to streamline operational workflows and reduce manual intervention.
- Architected scalable backend systems using Python, FastAPI, Flask, and React-based frontend applications.

Key Projects

NoblQ AI Assistant – Built a document-centric AI platform using Python, FastAPI, FAISS, and GenAI for semantic indexing, summarization, Q&A, and AI webinar support.

Sales Order Automation for SAP S/4HANA – Automated Sales Order creation using Power Automate, GenAI, and ML workflows triggered through enterprise email processing.

Agent Nob – Developed an Agentic AI assistant for SAP organizational structure design, workflow orchestration, and month-end process automation using GenAI and RPA.

Vendor Portal for SAP ByDesign – Created a supplier portal with onboarding automation and GenAI-based PO status assistant integrated with SAP ByDesign.

ServiceNow Catalog Assistant – Built an AI assistant using LangGraph and ServiceNow REST APIs to guide users through catalog item creation workflows.

Achievements

First Prize in AI Research – ICTCIT 2025

Part of the NOBL Q team that secured First Prize for the AI in Tamil research paper at ICTCIT-2025, organized by INFITT and SRMIST. Recognized for contributions toward AI innovation in regional language computing.

Education

Bachelor of Engineering (B.E.) – Computer Science and Engineering

Holycross Engineering College, Thoothukudi

2020 – 2024

Certifications

- Python Programming Course – GUVI (2023)
- AI For India 2.0 – Skill India & GUVI (2023)
- Mastering Microsoft Power Automate 2025
- IEEEPROEXPO'23 – National Level Project Exhibition
- AI – From Science to Practical Mastery – NoblQ (2026)
